

The First Industrial Titans

Golden Text: ¹⁹⁾ And Lamech took unto him two wives: the name of the one was Adah, and the name of the other Zillah. ²⁰⁾ And Adah bare Jabal: he was the father of such as dwell in tents, and of such as have cattle. ²¹⁾ And his brother's name was Jubal: he was the father of all such as handle the harp and organ. ²²⁾ And Zillah, she also bare Tubalcain, an instructor of every artificer in brass and iron: and the sister of Tubalcain was Naamah. Genesis 4:19-21

¶ In the beginning God created the heaven and the earth. ²⁾ *And the earth was without form, and void; and darkness [was] upon the face of the deep. And the Spirit of God moved upon the face of the waters.* ³⁾ **¶ And God said, Let there be light: and there was light.** ⁴⁾ *And God saw the light, that [it was] good: and God divided the light from the darkness.* ⁵⁾ *And God called the light Day, and the darkness he called Night. And the evening and the morning were the first day.* Genesis 1:1-5

Before there was time, there was God. God, Who is eternal, created time, space and matter. This creation all happened when God began time. God made the space and deep space of heaven. God placed Earth, the first matter in that space of heaven. God created - all you see, all you don't see. At that time Earth did not have continents and seas dividing them. There was no sunlight, no moon, no stars. Earth was empty. Earth was in darkness. The entire surface of Earth was covered with water. God the Holy Spirit hovered over the waters upon the face of Earth. God spoke: "Light!" And light appeared. Since there was no sun, moon or stars, Who was the Light? Was it the same Light that has always been the Light of the world? Was it the same Light that will be

when time is no more? Is the Lamb of God, (the Lord Jesus) the Light in that time? Elohiym God inspected the Light and declared it good, pleasant, agreeable. God separated Light from darkness. God named the period of time of light: Day. This light separated that first period of time into two distinct parts: Day and night. God named the period without Light darkness. That period of time began with the evening dark. Then when Light dispelled or drove off the darkness, came the Light of day. This was the first Day.

This first chapter of Genesis, goes on to explain in precise detail how God moved in His creation week to make things that would culminate (end up with) man. Man was made in the image and likeness of God. God made them male and female. That was how God created.

Then Day Two saw God separate heaven. God made the first heaven or sky above Earth. This sky separated the waters on the Earth from waters God placed above this Earthly atmosphere. On Day Three God made the dry land appear by gathering together the water into great bodies of water, God named Seas. God named the dry area Earth. God then commanded Earth, to sprout forth grass, plants, vegetation and herbs all with their own reproductive seeds. God called forth trees that bore fruit and all wood trees and stalks of every kind. They were all to reproduce from seeds of the same kind (such as the seeds in apples or oranges). As God commanded, Earth and plants responded and came into being. On Day Four, Elohiym God spoke: "Lights! Come into existence and be in the heavens, the near heavens and the deep space. Sun your job is to separate Day from Night as Earth rotates. And as Earth revolves and tilts on its axis, You will mark seasons and periods of time and years. A year will be the time that it will take Earth to rotate around Sun.

As God commanded it happened, on Day Four. The next day God made fish and things that fly in the air. But on day six God made from the dust of Earth the body of man but the inner parts of man, the soul realm and the spirit of man, God created from nothing that had existed in the past.

As difficult as most unbelievers (atheists) find the first chapter of Genesis, the most challenging to their beliefs is chapter four of Genesis. Why? It challenges much of what has been taught in the public schools of the last half century. They speak of stone-age, ignorant men who do not know how to herd flocks, farm, play music or mine. In contrast, the 4th chapter declares the accomplishments of early man in the first century upon earth. Chapter four begins with Cain and Abel. They are the epitome of the struggle of good and evil in the human race: two brother's with different reactions to God's directives and rules. Cain and Abel are farmers.

Farmers?!? Clearly we find that the first born man on earth 'tilled' (plowed, planted, cultivated, harvested) "the ground." And his younger brother Abel "was a keeper of sheep" and had flocks. (So much for the made-up stone-age men). This information presents us with a troubling dilemma. Are we to believe the Word of God or the teaching of man?

The church is **supposed to be** full of people who believe the Bible is the inerrant Word of God. However, for the last two hundred years, the church has been infiltrated with men-taught pastors who have believed it necessary to "protect God" from being ridiculed by men. They have taught the Word of God needs to be interpreted through the eyes of man (God's creation).

They think: POOR GOD! We had better speak for HIM, as HE obviously did not know how to properly communicate with HIS creation. Yet, if you are one who does believe God knows how to communicate with HIS people, you believe the Bible is true as it is plainly written. What we read in Genesis, Chapter four, is that before one hundred thirty years [fn¹] has passed, man is already farming and keeping flocks.

But, now we follow Cain, this man who murdered his brother. Cain alienated himself from God by his refusal to repent of the sin-crime. Cain made himself an enemy of God. Yet, we see amazing accomplishments. These were not supposed to have happened (according to what is currently taught in public schools) for speculated 'hundreds of thousands' of made up 'evolutionary years' after man was first on this planet.

The Greeks wrote of a Golden Age before a "flood." What did they have in mind? Without knowing it, the Greeks may have been writing about the sons of Cain (the man who was an enemy of God). What his sons accomplished, refutes later enemies of God. Those who now want you and I to abandon faith in God and His Bible teach in public school of ignorant, stone-age men, wearing skins and living in caves. This was supposed to be the state of men for hundreds of thousands of years of time (as evolutionists mark or calculate time). We will discover in the Bible, that the accomplishments by Cain's offspring refute the teaching, prevalent in public schools. Is there any wonder, that they do not want the Bible taught in public schools?

¹ And Adam lived an hundred and thirty years, and begat [a son] ... Seth: Genesis 5:3+ Genesis 4:25

The public school curriculum is stripped bare when compared to the Bible, in Genesis, chapter four. These early descendants of Cain, were herding, using musical gadgets, mining and smelting copper to make brass (bronze). This all occurred in a few hundred years (at the very most). [fn²]

Well, was there a great stone-age of cave dwelling men before there were farmers or miners or musicians? What was the basis for the Greek legend of a Golden Age before a great flood? Gather round the Bible now and learn of the development of the first “industrial titans” of the world.

~ Heavenly Father, Teach us the real Truth. You, Lord, have the Only real Truth. Teach me, I pray in the Name of Jesus Christ, our Lord. Amen. ~

OKAY now fasten your Spiritual seat belts!

CAIN’S LINE AND ACCOMPLISHMENTS: We follow Cain, who is banished because of the murder of his brother. Cain *went out* (go out, exit) from the place where he had known the LORD and Cain lived in a place called Nod (wandering). It was east of where had been the Garden of Eden. Cain had marital relations with the sister that he had taken to be his wife. She became pregnant and *Enoch* (Hebrew=dedicated) was born. Cain built a *city* (a place of dwelling for many people, usually with a wall or fence around it). Cain named the city (after his son) Enoch.

²And if the Bible (at this point) is being chronological, it could have been as short as less than one hundred thirty (130) years. See Genesis 5:3

Cain’s son Enoch was the father of *Irada* (fleet). Irada was father to *Mehujael* (smitten by God). His son was *Methusael* (who is of God). Now Methusael was daddy to *Lamech* (powerful). This was the fifth lineal descendant of Cain. (This Lamech is not to be confused with Noah’s father Lamech born to Methuselah more than eight hundred years later).

Polygamy: Lamech is the first man mentioned in the Bible who married two wives. This is the first record of polygamy. Lamech married *Adah* (Hebrew=ornament)(Adah was also the name of a wife of Esau hundreds of years after the flood. That was a different woman). Lamech also married *Zillah* (shade).

Okay, Adah was the mother of *Jabal* (stream of water). Jabal was ‘father’ of those who kept *cattle* (livestock). Jabal was probably the first tent nomad and herdsman. Although Jabal’s descendants all died in the great world wide flood, we still see today nomads who herd animals as in Tibet. (We have some nomads in the USA who travel the county in RVs and have no permanent home. ~You can smile) . This is the beginning of problems for those who teach man was here for hundreds of thousands of years without the ability to make tents (cave dwellers) or keep herds (hunter-gatherers). We have skipped those two stages and just knocked off, at the least, a quarter of a million years of made-up evolutionary time. See Genesis 4:16-20 [fn³]

³ ¹⁶ And Cain went out from the presence of the LORD, and dwelt in the land of Nod, on the east of Eden. ¹⁷ And Cain knew his wife; and she conceived, and bare Enoch: and he builded a city, and called the name of the city, after the name of his son, Enoch. ¹⁸ And unto Enoch was born Irad: and Irad begat Methujael: and Methujael begat Methusael: and Methusael begat Lamech. ¹⁹ And

And it gets worse for the evolution time line and story.

Jabal's brother was *Jubal* (stream) He was the first musician and the first teacher ('father') of those who played *harp* (lyre, harp) and *organ* (flute, reed pipe) [fn⁴]. **LYRE.** The lyre is not known in modern post flood times until the Greeks, which was only hundreds of years before Christ Jesus. Remember, however that David was playing an instrument for King Saul hundreds of years before the Greeks came to power and established their way of life throughout the region around the Mediterranean Sea. David's instrument (harp) was believed to be more like the lyre of Greek times. But, they had to learn from someone. And it appears lyres were here a thousand years before the flood and within one hundred thirty years of the time of man's creation by God. So much for the imagined m-i-l-l-i-o-n-s of years of struggle in 'pre historic' times without music. It was here all the time. And that should not surprise us. These people were very smart and had close contact with God.

FLUTES: There are Neanderthal flutes. (Neanderthal is pronounced Nee-ander-tall.' Neanderthals were so named as their remains were first found in Neander valley of western Germany. These men were first erroneously said to be ancestors of man, but they were

Lamech took unto him two wives: the name of the one was Adah, and the name of the other Zillah. ²⁰ And Adah bare Jubal: ... father of such as dwell in tents, and ... have cattle.

⁴ ²¹ And his brother's name was Jubal: he was the father of all such as handle the harp and organ.

larger and had larger brain capacities). They had flutes (pan pipes and whistles). American Natives played flutes.(My older brother learned how to whittle whittle a flute of sorts, a wooden whistle, from farmers who were immigrants from Sweden and Norway). Notice: The flutes may have been more like the pan pipe, perhaps even more advanced. It is amazing to realize that this is Cain's unGodly line that accomplishes all this. And in what period of time are all these accomplishments?

Although we have no ages of the men when they have their first son, if each of these men had sons at the age of 30 this could have been accomplished in 180 years. If we make each man's age 100, when his first son is born, then we would have 600 years. Many think this all happened before Adam and Eve gave birth to Seth and that would be in one hundred thirty years. (Genesis 5:3)

But if you think that was tough on the evolutionary time scale wait until you see what is coming next. **DECISION TIME COMING!**

TUBALCAIN: Next we come to an interesting man who has an unusual name (the meaning of the name is unknown). The only definition is: son of Lamech by his wife Zillah. Tubalcain was the first worker in metal. He is the first industrial Titan. And here he is in the Bible in Genesis chapter four. [fn⁵]

The public school *big bang-evolutionists* have a real time problem now. They teach vast ages of primitive man on

⁵ ²² And Zillah, she also bare Tubalcain, an instructor of every artificer in brass and iron: and the sister of Tubalcain was Naamah.

Earth before metal. But, the vast ages of primitive man have been taught ONLY since the 1820s, less than 200 years).

THE THREE-AGE SYSTEM Christian Jürgensen Thomsen (1788-1865 A.D.) was a Danish archaeologist, who lacked academic training. In 1816 he was appointed head of some collections in the predecessor of the National Museum of Denmark in Copenhagen. While organizing and classifying collections, he proposed an alternative to the Bible time line. He devised the three-age system about 1820. His periods of human history were three consecutive time periods, named for what he imagined were respective, predominant tool-making technologies:

The Stone Age is supposed to be the time when humans used crude stone tools. Only when it ends is there supposed to be the development of agriculture and the domestication of animals. This imagined stone age was split in three: *Paleolithic* (2.6 million years ago -to-10,000 B.C. ya); the *Mesolithic* (11,600 to farming ~middle stone age 'hunter-gatherers' transition to agriculture; the *Neolithic* (9500 B.C. - farming and metal age).

The Bronze Age 3000 B.C. or B.C.E. - 1200 B.C. There was smelting of copper and tin. But in Mesopotamia (Tigris-Euphrates area), they found evidence of early bronze, according to their dating of 2900 B.C.E. This would place it some long time after Tubalcain of the Bible.

The Iron Age (1200 B.C. or B.C.E. ~ 900 B.C.) When weapons and tools were mostly iron. This is before Jesus Christ, our Lord, took on flesh; before Rome was in charge of the 'Mediterranean' world. Yet, Tubalcain was instructing in both brass and iron within a few hundred

years after creation and it may be before Seth was born (130 years).

This Tubalcain was a teacher of those who worked in brass and iron. Brass is any alloy of copper and zinc. In comparison, bronze is principally an alloy of copper and tin. Despite this distinction, some types of brasses are called bronzes. Wikipedia reports that brass is an alloy. (An alloy is a metallic substance composed of two or more metals that are melted together) Brass is used for decoration for its bright gold-like appearance; for applications where low friction is required such as locks, gears, bearings, doorknobs, ammunition, and valves; for plumbing and electrical applications and extensively in musical instruments, such as horns and bells for its acoustic properties. Wikipedia states "Brass has likely been known to humans since prehistoric times,..." Okay Wikipedia, it has been known since early Bible times. Wikipedia continues "It was produced by melting copper together with calamine, a zinc ore.

Do you comprehend the magnitude of the understanding that brass was being used by Tubalcain? Man had to have quite a complicated operation going. To get brass, you have to have copper. Copper had to be mined from the ground and extracted from its ore. Then you have to melt copper to make brass. The melting point of copper is 1084.62° C or 1984.32° F. Do you understand? There had to be very hot furnaces that could reach temperatures of more than one thousand degrees. (Water boils at 100°C or 212° F.) So much for imagined

ignorant cave men who were supposed to live long ago and far away.

The First Industrial Titans

The Greeks understood and studied about societies and inventions “before a great flood.” Scholars see a similarity between Greek beliefs and Bible truth. It’s almost as if someone purposely perverted the truth of the Bible. We have a Greek woman opening up Pandora’s box and gazing at it, as Eve gazed at the forbidden fruit and then ate and sin came upon man. A Greek flood followed a Golden Age of man. The Bible tells how the unGodly line of Cain farmed, invented, played music, mined, smelted bronze, all before the flood of Noah. Noah was the only man who found grace in the eyes of the Lord. His deeds were righteous. The Greeks had a flood legend. In Greek history Deucalion, (δευκαλιων) was a common man, not a Titan like his father. He was known for his good deeds and the honorableness of his life. His wife's name was Pyrrha. She was one of the fairest of the daughters of men. (Sons of God, marry the daughters of men) Jupiter (devil figure) had bound Prometheus (good Titan) on Mount Caucasus. Jupiter sent diseases and troubles into the world. Men became very wicked. They no longer built houses, tended flocks and lived in peace. Every man was at war with his neighbor. There was no law nor safety in all the land. Because of the evil, a great rain storm was sent to destroy everyone.

It rained day and night for a long time. The oceans were filled to the overflowing. The water flooded the land. But, men kept on fighting and robbing, even while the rain was pouring down and the sea was coming up over the land. But, Deucalion, son of Prometheus, had been warned. He was ready for such a storm. He had never joined in any of the wrong doings of those around him. So when the rain began to fall, Deucalion drew from a shelter a boat which he had built. He and his wife floated safely on the rising waters that flooded until the mountains were covered. All the people on the earth were drowned. After a period of time, the rain

stopped. The boat drifted onto a high mountain named Parnassus. The clouds cleared. The yellow sun emerged in the blue heaven. Soon the water began to sink very fast and to run off the earth towards the sea. Deucalion and Pyrrha stepped out upon the dry land. After that, it was only a short time until the whole Earth was restored with green in the fields. The trees broke forth with new leaves. The streams were clear and the flowers more beautiful than in the days before the flood.

The Greeks wrote of this Golden Age before the flood when there were great inventions and marvelous things. They most likely were referring to the age of Cain's industrious offspring. And if his children did these feats, then how much more the Godly line of Seth? Thus, the first Titans of industry were: Jabal, Jubal and Tubal Cain, (an instructor in brass works and the iron industry). So, what are you going to believe? The truth found in God's word, the Greek myth (most likely a perversion of the real Bible) or the other made up evolutionary, vast age myth that has been around since about 1820? Only you know what you will choose to believe. Who is your God? What is Truth?

PRAYER: Almighty and most merciful God. We have been taught things which are in contradiction to the Bible, Your Holy Word. Show me what I should believe. Help me to have faith in You and Your Truth. Let me lay aside the myths of evolution and vast ages, as easily as I put aside the myths of Greece and their Mt. Olympus gods. Let Your Word, I pray, be in my mind and penetrate my heart and inner Spirit man. Help me to never, ever, ever doubt Your Word again. I confess that Your Word is Truth. Anything that is contrary to You and Your Word is error, perversion and sin. Come into my heart and life. Flood me with Your Truth, I pray in the Mighty Name of Jesus Christ, Our Lord. And all of God's children, who agreed, said. Amen.
